

PROFESSIONAL SUMMARY

Senior Python and Django Backend Engineer with 6+ years of experience architecting production-grade ERP systems, REST APIs, and workflow automation tools. Built and deployed an 11-phase ERP system (259 tests, Celery, Docker) handling real business operations. Expert in PostgreSQL optimization, async task management, and Linux-based deployments. Deep domain expertise in eCommerce operations—building systems that solve real business problems. Seeking Senior Backend or Platform Engineering roles where I can deliver scalable, maintainable software.

CORE COMPETENCIES

Python & Django:

- Django, Django REST Framework (DRF)
- Celery + Redis (async tasks, scheduling)
- PostgreSQL, SQLite, database design
- Operations-first architecture pattern

Frontend & Full-Stack:

- HTMX (server-rendered dynamic UI)
- HTML5, CSS3, JavaScript, Chart.js
- Django Templates, SASS/SCSS
- Responsive design, mobile-first
- No heavy JS frameworks — fast, lean UIs

Automation & DevOps:

- Python scripting (data processing, batch ops)
- Docker, Docker Compose, containerization
- GitHub Actions CI/CD pipelines
- Git, Linux, Bash
- Ansible, infrastructure automation

KEY PROJECTS

AMW Django ERP — Production-Ready Enterprise Resource Planning System

Full-featured ERP with employee identity, inventory management (WAC valuation), sales & purchasing workflows, policy-based IAM, audit logging, and HTMX-powered UI. 11 phases completed, 259 tests passing. Deployed to Render with Docker, PostgreSQL, Redis, Celery, and GitHub Actions CI/CD.

Django | PostgreSQL | Redis | Celery | Docker | DRF | HTMX | pytest

Digital Wallet — Fintech Dashboard Application

Multi-portal fintech wallet with client/staff separation, atomic transactions, fraud detection, async PDF statement generation via Celery, and analytics dashboards. Built with Django 5.2 LTS and PostgreSQL.

Django | PostgreSQL | Celery | Redis | ReportLab | HTMX

Pulse Feed — Real-Time Social Platform

Real-time social media platform built with Django, HTMX, and WebSockets. Pure server-rendered HTML with instant notifications — no JavaScript frameworks. Demonstrates real-time architecture without frontend complexity.

Django | HTMX | WebSockets | Python

CRM — Client & Project Management System

Client management system for freelancers and small businesses. Features live search (HTMX), dashboard analytics (Chart.js), mobile-responsive cards, and role-based access control.

Django | HTMX | Chart.js | SQLite/PostgreSQL

Shopify Open Orders Report — Python Automation

Python script that processes raw open orders data from e-commerce and generates formatted Excel reports with enhanced readability. Automates a previously manual 4-hour weekly task down to minutes.

Python | openpyxl | Data Processing

KVM Spin Ups — Infrastructure as Code Automation

DevOps-ready automation tool for KVM virtual machine provisioning. Modular Bash architecture with kickstart templates, input validation, security features, and comprehensive documentation. Supports Rocky Linux and AlmaLinux.

Bash | KVM | Libvirt | Kickstart | IaC

Linux Automation Infrastructure — Ansible Configuration Management

Automates multi-tier application deployment with Ansible: Docker setup, NGINX reverse proxy, PostgreSQL hardening, and CI/CD integration via GitHub Actions. Includes vault-encrypted secrets management.

Ansible | Docker | NGINX | PostgreSQL | GitHub Actions

PROFESSIONAL EXPERIENCE

Senior eCommerce Operations & Technical Lead

International Educational Products Exporter | Jan 2019 – Present | Cairo, Egypt

Technical Implementation & Development:

- Led complete Shopify store redesigns using custom Liquid sections, MetaObjects, and MetaFields — applying software architecture thinking to e-commerce templating.
- Built Python scripts to automate product uploads, inventory synchronisation, and pricing updates across 5 international stores (AU, UAE, DE, EG, Global). Reduced 4-hour weekly manual task to under 5 minutes (95% reduction).
- Developed data validation tools and Excel-based automation to ensure accuracy in high-volume operations, eliminating duplicate entries.
- Applied HTML, CSS, and JavaScript to build custom page layouts, responsive components, and dynamic content structures.

Multi-Region Operations & Coordination:

- Managed operational configuration for 5 international Shopify stores, standardising catalogue structure, payment gateways, and shipping rules.
- Architected MetaObjects data models for complex product attributes across 2000+ SKUs, enabling consistent display across multiple countries.
- Served as primary technical liaison with Shopify Support for advanced API issues and app conflict resolution.

TECHNICAL SKILLS

Languages: Python, Bash, SQL, HTML5, CSS3, JavaScript

Frameworks: Django, Django REST Framework, Celery

Databases: PostgreSQL, SQLite

Frontend: HTMX, Chart.js, SASS/SCSS, Responsive Design

DevOps: Docker, Docker Compose, GitHub Actions, Git, Linux

Automation: Python scripting, Ansible, Bash, workflow optimization

Testing: pytest, pytest-django, coverage reporting

Code Quality: ruff, black, isort, pre-commit hooks

AI-Assisted Development: AI coding assistants for rapid prototyping & code acceleration

EDUCATION & CERTIFICATIONS

AI Zaytoon Wireless Institute — Post-Secondary Diploma in Telecommunications & Radio Systems (GMDSS) | 2.5-year program

AWS Cloud Practitioner — Credly Badge | Cloud fundamentals, AWS services, deployment models

ADDITIONAL INFORMATION

Languages: Arabic (Native) | English (Professional Working Proficiency)

Military Service: Completed (2011–2013) — Required national service in Egypt

Open to Senior Backend and Platform Engineering roles — ready to deliver scalable, maintainable software.
